

Donald G. Janelle is a Research Professor at the University of California Santa Barbara, and is Program Director of the Center for Spatially Integrated Social Science (www.csiss.org). CSISS was founded in 1999 with support from the National Science Foundation to develop research infrastructure, with a primary focus to assist in the dissemination of spatial thinking and spatial technologies across the social sciences. Don served previously as Chair of the Department of Geography and as Assistant Vice Provost at the University of Western Ontario. His research focuses on temporal patterns of spatial behavior in cities, the social implications of transportation, telecommunication and information technologies, and the development of urban-regional spatial systems. He co-edited with David Hodge *Information, Place, and Cyberspace. Issues in Accessibility* (Springer-Verlag, 2000) and with Michael Goodchild *Spatially Integrated Social Science* (Oxford University Press, 2004). From 2002 through 2005, Don served as the North American Coordinator of the STELLA (Sustainable Transport in Europe and Links and Liaisons with America) Focus Group on Information and Communication Technologies and Innovation in the Transport System. He is a recipient of the Edward L. Ullman Award for Career Contributions to Transportation Geography from the Association of American Geographers.
