

**Shih-Lung Shaw** is a Professor of Geography at The University of Tennessee, Knoxville. His research interests include geographic information systems for transportation (GIS-T), travel demand analysis, effects of information and communications technologies (ICT) on transportation, and temporal GIS. He co-authored a book with Harvey Miller - *Geographic Information Systems for Transportation: Principles and Applications* (Oxford University Press, 2001). Shih-Lung served as the Chair of the Transportation Geography Specialty Group (2000-02) and as the Secretary/Treasurer of the GIS Specialty Group (1994-95) of the Association of American Geographers (AAG). He currently serves on the editorial boards of *Journal of Transport Geography* and *Southeastern Geographer*. He also actively participated in the Focus Group 2 (ICT, Innovation and the Transport System) of the *Sustainable Transport in Europe and Links and Liaisons with America* (STELLA) from 2002 through 2005.
